ERNST STOELTZING PAINT CO. **KANSAS CITY, MO.**

PARCEL POST RATES

This Catalog represents the line of goods we carry to which we are constantly adding—we try to arrange this so our customers can readily find the articles they are looking for. You will find the INDEX on Pages 1, 2 and 3 very complete.

RUSH LETTERS—Can Be Sent by **AIR MAIL** for 5 Cents—Use Regulation Postage Stamps and Mark Letter **AIR MAIL**

REGARDING MERCHANDISE BY AIR MAIL

Some customers order goods sent by Air Mail without knowing the cost which must be prepaid. The Air Mail Rate for merchandise is 5 cents for first ounce and 10 cents for each succeeding ounce, making the rate for one pound—Mailing Weight \$1.55 and in figuring postage you must allow sufficient to cover weight of packing material.

OUR TERMS

CASH WITH ORDER—This is the money saving way to buy. We allow 2% discount for cash with order. Add postage unless items are marked postpaid.

C. O. D.—To avoid delay send a deposit of 25% with your order to guarantee acceptance. On freight C. O. D. give name of your bank to which we will send draft with bill of lading.

OPEN ACCOUNT—Our terms are 30 days net, 1% ten days. We open accounts with any one well rated or established in business who can supply satisfactory references. To avoid delay, we suggest you send cash with first order or authorize C. O. D. shipment and at that time apply for an account, giving bank and at least two business houses.

PARCEL POST RATES

This table shows the amount of Postage required (to ship by Parcel Post) on packages of various weights, according to distance (by zones) from Kansas City.	Zone 1	Zone 2	Zone 3	Zone 4	Zone 5	Zone 6	Zone 7	Zone 8

Stoeltzing's "Lead and Zinc" Paste White

A Lead and Zinc combination ground to a paste consistency in Pure Linseed Oil.

You can now secure the highest quality paint at the price of inferior grades.

Weights 25 Pounds to the gallon. Use 2 gallons of Linseed Oil and 1 quart of Turpentine to the gallon of Paste White for priming coat. For finish coat, use 1½ gallons of Pure Linseed Oil.

NOTE THIS SCHEDULE CAREFULLY

COST OF PRIME COAT		<i>Schedule based on current market price of Linseed Oil, which is subject to change without notice.</i>	COST OF FINISH COAT	
1 Gallon	\$3.95		1 Gallon	\$3.95
2 Gallons Linseed Oil.....	2.00		1½ Gallons Linseed Oil.....	1.50
1 Quart Turpentine.....	.30			
3¼ Gallons Paint for.....			2½ Gallons Paint for.....	
Or \$1.92 per gallon, first coat.			Or \$2.18 per gallon, finish coat.	

STOELTZING'S PASTE WHITE is a paste white, not a semi-paste white. It stands a greater reduction with linseed oil, making it more economical and better, because linseed oil is the life of paint.

STOELTZING'S PASTE WHITE not only costs less per square foot of surface covered, but puts off the cost of repainting for a longer time than ordinary paint.

Stoeltzing's Paste White

Lead and Zinc Paste White is a practical product with a strong appeal to the master painter. It is a paste white (like soft paste lead) composed of lead and zinc, which makes an extra-heavy, smooth paint of pure ingredients. It is supreme in whiteness, covering, spreading and durability.

May be used for either inside or outside painting.

1 Gallon Cans (25 Pounds).....	Per Gallon	\$3.95
½ Gallon Cans (12½ Pounds).....	Each	2.10
Quart Cans	Each	1.15
Pint Cans	Each	.60
One 5 Gallon Can (About 125 Pounds)....	Per Gallon	3.90

A Product of 65 Years Experience

We pay freight on 100 pounds of material 150 miles or over from Kansas City, Missouri, except Lead, Oil, Turpentine.

DRI-SEAL

Seals the Pores

DRI SEAL

The ideal sizing for all work — the magic paint foundation; for *plastered walls* — Dri-Seal eliminates all possibility of burning out, prevents dampness, alkali and air pressure; peeling, cracking, chalking, blistering and scaling; no glue sizing is required when Dri-Seal is used; it prevents flat or

gloss paint burning out on plastered walls, when used straight or mixed half and half with wall paint and makes the enamel stand out with a higher gloss.

For Tiffany Work and Decorating—Dri-Seal is the perfect foundation for use over paper or canvas when tiffany or similar decoration is to be used, as it gives a perfectly

sealed base upon which to work and increases spreading.

For Woodwork—Dri-Seal gives a hard, firm surface which stands as smooth as glass; seals the pores perfectly and “stands up” like a coat of shellac.

For Sealing Knots or Pitchy Lumber—The addition of 1 gallon Dri-Seal to each gallon of pure linseed oil paint over lumber containing knots, pitch or rosin effectively seals the surface and prevents such spots from coming through the other coats of paint to be applied.

Prevents “Lime Burns”—To eliminate all possibility of burning out, peeling, cracking, or scaling on plaster walls by doing away with suction or dampness and sealing in the alkali and air pressure, use half Dri-Seal and half wall paint on first coat.

Drums	Per Gallon	\$1.50
5 Gallon Cans	Per Gallon	1.60
1 Gallon Cans	Per Gallon	1.70

SEALERINE PRODUCTS

SEALERINE PALE

A blending of China wood oil with refined linseed oil and other oils under certain temperature conditions, producing a full bodied paint vehicle of extreme toughness and elasticity, remarkable reinforcing qualities, and of such a pale color that it may be used in pure white or lightest tints without fear of discoloration. Sealerine used with paint, inside or outside,

adds greater durability and increases the covering capacity one-third; overcomes all trouble caused by dampness, alkali or acids.

Drums	Per Gallon	\$1.90
5 Gallon Cans	Per Gallon	1.92
Case (Twelve 1 Gallon Cans)	Per Gallon	2.03
1 Gallon Cans	Per Gallon	2.05
Quart Cans	Each	.75

SEALERINE INTERIOR

Sealerine Interior is the result of skillful blending of fossil gums and China wood oil, producing a vehicle of such extreme heavy body, that even after reducing the same with thinners, it leaves a very heavy film when applied clear or mixed with pigments.

Drums	Per Gal.	\$1.97
5 Gallon Cans	Per Gal.	2.00
Case (Twelve 1 Gallon Cans)	Per Gal.	2.00
1 Gallon Cans	Per Gal.	2.11
Quart Cans	Each	.80

SEALERINE PIGMENT WALL PRIMER

A pale Sealerin oil into which has been ground a perfectly balanced and incorporated pigment content and lime neutralizer. It is pure white; may be tinted to any desired color. Will overcome all suction and lime burning. It brushes easily, dries hard over night and covers 1,000 square feet per gallon.

Drums	Per Gal.	\$2.16
5 Gallon Cans	Per Gal.	2.22
Case (Twelve 1 Gallon Cans)	Per Gal.	2.30
1 Gallon Cans	Per Gal.	2.33
Quart Cans	Each	.85

ADHESIUM

For Paper Hangers, Decorators and Painters

A remarkable wall paper size for the paper hanger, decorator and master painter—as a size for walls—as an adhesive—as a “hot spot” finder—as a filler for raw wood—as a primer or first coater—as a between coater for paint. Easy to use on any surface, plaster, wood, metal, brick and glass. May be used on painted and kalsomined surfaces.

12 Gallons Lots	Per Gallon	\$1.60
6 Gallon Lots	Per Gallon	1.70
1 Gallon Cans	Per Gallon	1.80
½ Gallon Cans	Each	1.00
Quart Cans	Each	.75

Stoeltzing's Tone-A-Wall Flat Finish

Contractors' Flat Wall Paint

A COMPETITIVE QUALITY PAINT

Our contractors' flat wall paint is prepared to meet a demand for an interior wall paint of good value at a price less than that of our Tone-A-Wall finish; it spreads well, does not show laps or brush marks and produces a good, soft, velvety effect; the best value on the market for the price.

Furnished in White and Seventeen Tints.

Valentine's Undercoat and Architectural Finishes

VALENTINE'S FOUR HOUR ARCHITECTURAL FINISHES

VALENTINE'S ENAMEL

ARCHITECTURAL FINISHES

Valentine's Four-Hour Enamels are made in white, gray, ivory and semi-gloss. Two coats of Four Hour Enamel will give a fine, full-toned, smooth finish. Will not show brush marks or skin in the can. A typical Valentine product. This is a quality enamel, made for the practical painter.

Tinners' Red Paint

Stoeltzing's

Stoeltzing's Tinners' Red Paint is expressly made for sheet metals. It is recommended by many experienced sheet metal workers as absolutely the best sheet coating on the market. Particularly adapted for the protection and preservation of sheet metal roofs, eaves trough and down spouts, valleys, ventilators, skylights, etc. Has best oxide of iron base, finely ground, lin-

seed and drying oils thoroughly mixed and heat treated. Spreads easily. Covers well and very durable; none better to be had.

Galvanized Iron Primer

Stoeltzing's

Stoeltzing's Galvanized Iron Primer is the best first-coater for painting galvanized iron to prevent subsequent coats from peeling. It is a specially prepared primer to penetrate the zinc spelter and pores of the steel base. When the primer coats are thoroughly dry, any good outside paint may be applied, will stick and wear. This is a primer only, not a paint. Covers about 500 square feet to the gallon. Furnished in Gray and Red.

Stoeltzing's Galvanized Iron Primer

U-KAL-O WALL COATING

U-KAL-O is a sanitary, durable and artistic wall coating, making possible the most beautiful interior decorative effect known.

U-KAL-O is easy to mix and easy to apply. Is less expensive than wall paper or oil paints. U-KAL-O is made in dry powder form and ready for use when mixed with cold water. It will not rub off and can be cleaned like wall paper.

Stoeltzing's Fresco Cold Water Paint

Water-proof—For Outside Use

An economical, high grade coating for exterior use; not a kalsomine, but a wonderful cold water weather-proof paint, a substitute for oil paint; made in powder form and mixes easily with cold water and produces a waterproof coating which will not wash off. Five pounds of the powder will produce a gallon of good paint; will withstand rain, snow, dew and fog; prepared expressly for designating safety zones and parking space, also extensively used for filling station curbing. Furnished in White only.

Waterproof Cement Paint Bondex

Waterproof Cement Paint—"The Perfect Stucco Finish"

BONDEX Waterproof Cement Paint is the newest development in the paint industry—a paint that bonds perfectly with stucco, concrete, hollow tile and other masonry wall surfaces.

BONDEX comes in the form of a dry powder and is made ready for use by simply mixing with cold water. It can be applied to a wet or dry surface. It won't chip, crack, rub, or peel off because it becomes a part of the surface itself. BONDEX

may be had in white and many colors which may be intermixed to form an endless variety of shades. The colors are permanent.

BONDEX will not stick on wood, wallboard, metal or glass, nor is it to be applied to sidewalks, floors, "floated" concrete or smooth plaster.

The cost of applying BONDEX is less than other coatings, for while BONDEX may be applied with a Dutch Kalsomine brush, the most satisfactory and economical way is with a spray machine. An ordinary hand power spray pump is all that is needed.

Five pounds of powder when mixed with cold water makes approximately one liquid gallon. While a gallon will generally give complete coverage of 100 square feet with one coat, we recommend two coats to thoroughly waterproof and do a guaranteed job.

THE BONDEX SPRAYER

The BONDEX Sprayer was selected by the manufacturers of BONDEX as the most satisfactory and economical method of applying BONDEX, and you will find it a sturdy, worthwhile outfit.

It is equipped with:

- 10 Feet Spray Hose.
- 5 Feet Spray Pipe.
- 1 Special Stop Cock.
- 1 Steel Tipped Nozzle.
- 1 Bordeaux Nozzle.

Capacity: 5 gallons.

Plastex Finish and Modex—The Modern Paint

Modex—the Modern Paint

“Niches in Between Oil Paint and Kalsomine”

Made in dry powder form, in white only. Modex is broken up with water, then Boiled Linseed Oil is added and water is used to reduce to using consistency. Can be tinted, is washable, may be brushed or sprayed. Dries in four hours.

Modex can be used on all interior wall or ceiling surfaces, also on wood or metal.

Five pounds of Modex covers 200 to 300 square feet of surface one coat.

STOELTZING'S No. 711 Remover

Will Remove Paint, Varnish, Lacquer or Enamel

A wonderful remover for Automobile bodies; it has a wonderful solvent power if properly used and does not raise the grain of the wood or discolor; to obtain best results from Stoeltzing's No. 711 Varnish Remover, apply a liberal coat by stroking one direction only; the time it should remain before removing, depends upon hardness,

thickness and nature of paint, varnish or enamel to be removed; this Remover is slow drying and continues to penetrate as long as it is wet; use a putty knife for removing from flat surface, on moulding, etc. Use steel wool, then clean thoroughly with benzine.

STEEL WOOL Long Strands

Steel wool does the work of sand paper, pumice, pastes, powders or home cleaners. It is strands of

tempered steel, long and tough and wooled to a thick mass that provides just enough hardy resistance to rough surfaces, rust, tarnish, stains, grease, etc. Its softness provides the right polishing efficiency for securing a slick, smooth, scratchless finish.

Dust and Spray Masks

Dr. Willson

A dust and spray mask is an absolute necessity at all dusty work and spraying. It prevents illness, the result of breathing irritating and poisonous dust and spray. For use in spraying paint and lacquering, handling cement, plaster cleaning powders, dry colors, etc. Indispensable in shops, mills and factories. Full directions with each respirator.

SPECIAL OFFER:

With your first order amounting to \$5.00 or more we will send **FREE** one Safety Razor Blade Holder, also one painter's cap, any size.

Power and Hand Sprayers

BINKS NEW "HURLEY UNIT" No. 306-L
Operates From Any Light Socket

A practical spray equipment which will handle heavy paints, lacquers, varnish, etc. Equipped with 10 feet of hose. Uniform air pressure now conveys the material through the cup and insures a steady, even flow of material to the spray gun. The atomization (mixture of air and material) takes place at the nozzle head, not at the end of the spray where evaporation otherwise dissipates the most essential solvents. The Binks Spray Gun applies every ingredient uniformly. A perfect flat fan-shaped spray is applied with ease and simplicity. Auto repair shops, contractors, builders, scenic painters, maintenance crews and property owners generally are now saving huge sums annually in mechanical painting.

No. 306-L— $\frac{1}{4}$ H. P. Single Phase A. C. 110 Volt, 60 Cycle. Price, Complete.....\$68.50

Binks Hurley Unit Spray Gun with Quart Container. Each..... 16.50
NOTE—Also supplied for D. C. and 220 Volt at slight advance. WRITE FOR PRICE.

Shipping weight, 47 pounds.

BINKS "THOR" UNIT No. 76-L
Operates From Any Light Socket

The material cup is not of the ordinary suction type. The material is fed by air pressure through the cup. This produces a dependable, even flow of paint to the spray gun. Color lays with remarkable smoothness and speed. The cup is made of substantial metal and holds one quart.

Though weighing less than five pounds, the unit develops 20 to 30 pounds air pressure. There is no complicated machinery to get out of order. Perfect lubrication is insured by self-feeding wick grease cups. It operates from any light socket of 110 to 120 volts. The special Universal motor operates on 25 to 60-cycle A. C. or D. C. of the same voltage. The unit is complete with no extras necessary.

No. 76-L—Outfit complete with 10 ft. hose.\$39.50
Shipping weight, 12 pounds.

All portable material is priced F. O. B. Kansas City. We require from a week to ten days to fill orders on complete air compressors or units.

Will spray lacquer, varnish, paint, etc. For spraying flow-ers, cattle, bugs, etc. Can be used as a gasoline torch.

BINKS No. 222 OUTFIT

Binks Outfit No. 222 is widely used for general utility purposes about the home, farm, factory, institutions, and garages. The No. 22 Spray Gun is of special design, far superior to any other at this low price. It is of syphon type; has a sturdy, cast aluminum cup holder. Standard Ball Mason Fruit Jar of pint capacity which gives it the advantage of transparency as it shows the amount of material in the cup. Separate containers easily available everywhere. The material is syphoned to the nozzle of the gun where extremely fine atomization takes place. This outfit operates from the power and air pressure of any auto, truck, or tractor engine. Simply connect the air pressure valve to the spark plug opening and let the motor idle.

The Binks No. 222 Outfit consists of the following equipment: No. 22 Spray Gun with cup; one air pressure valve to attach to the engine of a standard automobile, tractor, truck, etc., which furnishes the compressed air; 25 feet of $\frac{3}{8}$ -inch air hose with connections.

No. 222—Binks Outfit, Complete.....\$9.95
No. 22—Gun With Cup Only..... 4.50

BINKS No. 333 OUTFIT

Binks No. 333 Outfit is of similar design to the Binks No. 222 Outfit mentioned above excepting that it uses the Binks No. 33 Pressure Cup Gun instead of syphon cup.

By use of the pressure cup attachment, heavier material can be used and a faster spray obtained than by any other method. It is particularly suitable for use in painting farm machinery, furniture, or other small jobs where a comparatively fast spray and small amount of material are used. The valves attach to the engine of a standard automobile, tractor, truck, etc., in place of the spark plugs and the engine is allowed to idle. The Binks No. 333 Outfit consists of the Binks No. 33 Pressure Cup Gun; 2 spark plug valves for compressing air; 25 feet of $\frac{3}{8}$ -inch air hose and "Y" connections with 2 short lengths of hose.

No. 333—Outfit, Complete.....\$24.95
No. 33—Gun With Cup Only..... 16.50

¼ Pounds Tubes.....	Each	.40

Ditz-Lac Spray Automobile Lacquer

Ditz-Lac Standard Pyrozylin Enamels

Ditz-Lac Enamel is offered as the highest development of a Pyrozylin Enamel that will best serve the requirements of the automotive industry for refinishing work, as well as factory production. This material sprays on evenly, levels out nicely, requires very little rubbing and polishes to a high luster easily, resulting in a beautiful and durable finish with a minimum amount of labor. (Color card sent free on request.)

We also issue a Two-Color Combination Book (value \$5.00), which is sent free to purchasers of six gallons of Ditz-Lac and Ditz-Lac Material. It is not necessary to purchase this at one time, but after purchasing this quantity write us and the book will be sent FREE.

Ditz-Lac Thinner—Gloss Black—Tinting Colors

Ditz-Lac Intermix Colors

With a set of SIXTEEN INTERMIX COLORS you can match practically any shade your trade wants from the tested formulas which come with the set. It enables you to give a vastly improved service to your customers. Avoids delays, and establishes a reputation for quick service in your community.

Color Outfit Consists of

One Quart White Ditz-Lac.....	\$ 1.50
One Quart Tinting Black No. 37.....	1.40
One Quart Tinting Red No. 35.....	1.60
One Quart Tinting Maroon No. 529.....	2.35
Twelve Quarts Assorted Colors at \$1.50.....	18.00

Complete Set of 16 Colors.....\$24.85

With a Complete Outfit you get a Bound Loose-Leaf Intermix Formula Book, value \$10.00, giving full directions for producing all the different shades used on the standard makes of cars, also two glass graduates, a spatula and strainers. Your name will be listed at the factory and as new shades are added you will be sent formulas for mixing them. Never out of the latest colors. Always in your shop.

This is the New Progressive Method of Producing the New Shades for All Cars

DITZ-LAC LACQUER THINNER

We recommend that Ditz-Lac Thinner be used when spraying Ditz-Lac materials.

DITZ-LAC THINNER No. 16

Ditz-Lac Thinner No. 16 is an inexpensive thinner containing absolutely no benzol, is free from any disagreeable odor and is recommended for reducing Ditz-Lac enamels and surfacers.

Quart Cans	Each \$0.50
1 Gallon Cans.....	Per Gallon 1.65
5 Gallon Cans.....	Per Gallon 1.50
30 Gallon Drums.....	Per Gallon 1.35
55 Gallon Drums.....	Per Gallon 1.25

DITZ-LAC STRIPING THINNER No. 11

Ditz-Lac Striping Thinner No. 11 is to be used in reducing Ditz-Lac Striping materials for application.

Quart Cans	Each \$1.30
Pint Cans	Each .75
¼ Pint Cans.....	Each .35

DITZ-LAC RETARDER

Ditz-Lac Retarder is recommended for use when the atmospheric conditions have caused a "blush" on the lacquer film, due to the precipitation of the moisture in the air upon the surface.

1 Gallon Cans.....	Per Gallon \$4.50
Quart Cans	Each 1.25

DITZ-LAC GLOSS BLACK No. 60

Matches baked enamel. Dries with a high gloss. Also can be rubbed and polished. This is a wonderful Black, when sprayed properly. Always use plenty of good thinner when reducing No. 60 High Gloss Black. Use 2 parts thinner to 1 part No. 60 Gloss Black for last coat.

Quart Cans	Each \$1.35
1 Gallon Cans.....	Per Gallon 4.50
Six 1 Gallon Cans.....	Per Gallon 4.45

DITZ-LAC STRIPING LIQUID

To be used with Japan Color for preparing a colored lacquer striping.

Quart Cans	Each \$1.90
Pint Cans	Each 1.15
½ Pint Cans.....	Each .50

DITZ-LAC BLACK No. 1208

A New Black By Ditzler

This is a new permanent Black, that can be rubbed and polished as soon as it dries. Very durable for body and fender refinishing. Polishes very easily and holds its gloss.

1 Gallon Cans.....	Each \$3.75
Six 1 Gallon Cans.....	Per Gallon 3.60
Quart Cans	Each 1.25

DITZ-LAC JET BLACK No. 830

A solid covering dense Black for rubbing and polishing.

1 Gallon Cans.....	Per Gallon \$5.25
Quart Cans	Each 1.40

DITZ-LAC TINTING COLORS

Stoeltzing's "NO-KRACK"

For Surfacing Auto Bodies, Wagons, Trucks, Etc.

PRIMER-SURFACER

NO-KRACK is an elastic, impervious filler or surfacer—also a primer for wood, metal, canvas, etc. Resists heat, prevents rust and fills checks or cracks in old paint and varnish surfaces.

Very elastic and resistant to expansion or contraction of metal.

Sands out very easily to a perfect surface. A perfect undercoat for lacquer.

FILLER-GLAZE
